# **CLEANING AND MAINTENANCE**

## ROUTINE CLEANING

Use microfibre cloth to remove dirt or dust from the surface. Simply wash the surface with water. You may add cleaning agents according to the recommended dose. Rinse with clean water and dry with a cloth. Immediately clean any stain without letting it dry is highly recommended.

## ADVANCE CLEANING

When routine cleaning is not enough, specific procedures are required, depending on the nature of the stain to be removed. In these cases, using a recommended aggressive product will not affect the beauty of the surface. The amount of time the stain remains on the surface is dictate the easiness of cleaning, so cleaning as soon as possible is highly recommended.

**Tip : Start cleaning on a small part of the area to check its effectiveness before applying it to the whole surface. Never use concentrated hydrochloric acid, caustic soda or products that contain hydrofluoric acid and its derivatives.**

## CLEANING TOOLS

### DAMP CLOTH

Apply the cleaner to the stain and leave it for some time to act as specified. Rinse carefully and dry with a clean cloth.

### NON-ABRASIVE SPONGE

Sponge : Apply the detergent and leave it for some time to act as specified. Use a damp non-abrasive sponge, making circular movement over the stained surface to be cleaned. Rinse carefully with clean water and dry with a clean cloth.

### MOIST SCOTCH BRITE NON-SCRATCH SPONGE

Apply the cleaner to the stain and leave it for some time to act as specified. Rinse carefully and dry with a clean cloth.

### FINE BROOM OR PLASTIC BRUSH
